PROFESSIONAL SUMMARY

Data Analyst and 3rd-year CS student (IS Dept.) skilled in turning complex data into strategic solutions. Expertise ranges from manipulating data using **Python** and **SQL Window Functions** to visualizing trends in **Power BI**. Developed automated **SSIS** workflows that saved **40%** of reporting time and analyzed datasets exceeding **1M records**. Committed to driving operational efficiency through data-driven storytelling.

EDUCATION

Assiut University
Bachelor of Computer Science (Information Systems Major) – GPA: 3.8/4.0
Relevant Coursework: Database Systems, Data Structures, Statistics & Probability, Data Mining, Big Data.

Assiut, Egypt
Sep 2023 – July 2027

EXPERIENCE

FCI Data Analysis Bootcamp
Data Analysis Trainee

- Optimized complex SQL queries by replacing nested subqueries with **CTEs** and **Window Functions** for better performance.
- Designed a robust **Data Model (Star Schema)** to integrate data sources, enabling efficient filtering and reporting.
- Developed interactive **Power BI dashboards** to visualize key metrics, identifying top performers from **50000+ records**.

National Telecommunication Institute (NTI)
Data Analyst Intern

- Developed **4 interactive dashboards** using **Power BI** based on diverse datasets processed via **SQL** and **Python**.
- Performed data cleaning and exploratory analysis (EDA) on complex datasets to ensure accuracy for visualization.
- Collaborated with a team of 4 peers to deliver a final capstone project, achieving a **98% performance score**.

Data Pill
Data Analyst Intern

- Accelerated data processing by **20%** for **100,000+ transactions** by engineering optimized ETL pipelines using **SSIS**.
- Designed a **Star Schema** data model that reduced dashboard loading latency by **35%**, enhancing user experience.
- Ensured **100% data accuracy** by implementing automated validation scripts, enabling reliable daily reporting for management.

Assiut University
Oct 2025 – Nov 2025
Aswan, Egypt
July 2025 – Aug 2025
Remote
June 2025 – Aug 2025

PROJECTS

Real Estate Market Analysis | *SQL, SSIS, Power BI, Data Modeling* | **GitHub Repo**

- Collaborated with a **team of 5** to build an end-to-end BI solution, migrating raw **Excel data** into a SQL database via **SSIS ETL** pipelines.
- Analyzed **19K transactions** (\$90.83bn sales) by designing a **Star Schema** to support high-performance analytical reporting.
- Developed **DAX measures** for KPIs, uncovering a **\$18.97bn Net Profit** and visualizing growth trends in **Sheikh Zayed and Alexandria**.

Supply Chain & Sales Analysis | *SQL Server, SSIS, Power BI* | **GitHub Repo**

- Engineered automated **ETL pipelines** using **SSIS** to clean and transform raw warehouse data into a **Star Schema**.
- Developed **Power BI dashboards** revealing a high dependency on 'Fabrikam' supplier and risks in seasonal product lines.
- Uncovered a critical profit drop from **\$27M to \$11M**, attributing it to poor demand forecasting for seasonal items.

Road Accidents Data Analysis | *Power BI, Data Visualization* | **GitHub Repo**

- Processed and analyzed a massive dataset of **1M+ records**, identifying patterns that reduce accident risks.
- Developed dashboards highlighting Brazil's **126K+ injuries**, enabling targeted region-specific safety strategies.
- Quantified risk factors by determining that **50%** of total fatalities are caused by Driver Fatigue.

IMDb & TMDB Movies Analysis | *Python, Power BI, EDA* | **GitHub Repo**

- Optimized data cleaning pipelines using **Python** to process metadata for **45,000+ movies** with high efficiency.
- Visualized global market trends across **12K movies**, tracking a total revenue of **\$1.26 Trillion**.
- Delivered actionable insights on the US market dominance (**\$698bn revenue**), influencing content strategy analysis.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Advanced, CTEs, Window Functions), C++
Data Visualization & BI: Power BI (DAX, Power Query, Modeling), Microsoft Excel (Pivot Tables, Macros, Lookups)
Databases & ETL: Microsoft SQL Server, SSIS (Integration Services), ETL Pipelines, Star Schema Design
Core Concepts: Data Structures, Algorithms, OOP, Statistical Analysis, Data Cleaning, EDA
Soft Skills: Data Storytelling, Team Collaboration, Problem Solving, Critical Thinking, Time Management
